S.A. ENGINEERING COLLEGE

Innovate, Code, Lead

“Next Gen Tech Starts Here”

SAEC - Vision

- To aspire excellence in Education and Research, in Engineering and Management, fostering conversion of knowledge, providing technologically sustainable solutions to industry and society adhering ethical values.

SAEC - Mission

Education : To facilitate professional development and active learning and accelerate Engineering and Management transition to obtain admissible solutions.

Research : To promote innovative, resourceful techniques in Industrial collaborative research utilizing cognitive skills.

Sustainable Solutions : To practice high standards of ethics and create a conducive atmosphere for multi-disciplinary sustainable solutions.

Industry and Society : To provide the core concepts of industrial values nurturing Industry Institute Collaboration for the benefit of the student community and society.

Empowering Students

The MCA course conducted by the institution is aimed at imparting ample knowledge and practice covering all aspects of computer use in the industry.

The content of the course undergoes timely revisions. The course structure and syllabus has been revised in the academic year 2026-27.

The Curriculum includes a combination of three types of courses : Computer Science, Mathematics and Computer Applications. Every student is mandatorily to take up a system development project or Industrial Training work in the final semester.

Department of MCA

The Department of Computer Applications (MCA) was established in the year 1999 with the objective of imparting quality education in the field of Computer Science. The Department has contemporary facilities for teaching, learning and research.

MCA - Vision

- To be a leader in computer applications to prepare students in research, promoting creativity, moral values and sustainable technologies that benefit the digital world and society.

MCA - Mission

Education : To impart technical learning experience that assimilates creativity, critical thinking, and lifelong learning in Computer applications.

Research : To promote research in the field of computer applications, addressing needs of the society.

Sustainable Solutions : To provide sustainable solutions for the real world problems by upholding ethical standards.
