INNOVATIVE TEACHING METHODS

Sl.No.	Pedagogical Methods	Outcomes	Activities
1	<p>USE OF ICT TOOLS - Information and Communication Technology (ICT) tools are valuable tools in the field of education, enhancing the teaching and learning experience in various ways. Assist educators in presenting information in a structured and visually appealing manner. Use images, graphs, and charts to supplement verbal explanations. Add visual interest to maintain student focus.</p>	<p>Students will be able to understand the concept clearly as complex processes or experiments can be visually demonstrated.</p>	

2	<p>USE OF MODELS IN TEACHING- The use of models in teaching is a valuable pedagogical approach that involves the use of representations or simplified versions of real-world concepts to aid in the learning process. Models help students understand complex ideas, visualize abstract concepts, and make connections between theory and practice.</p>	<p>Students will be able to understand abstract concepts clearly. Increases the students interest in class and makes the class more interactive.</p>	
3	<p>PROJECT BASED LEARNING- Project-Based Learning (PBL) is an instructional methodology that involves students working on a project over an extended period to explore and answer a complex question, solve a real-world problem, or create a tangible product. PBL is designed to engage students in active, hands-on learning, promoting critical thinking, collaboration, and the application of knowledge.</p>	<p>Students obtain creative capacity to work through difficult or ill-structured problems, commonly in small teams. It helps the students to develop the skills to work in Industry.</p>	

4	<p>ACTIVITY BASED LEARNING- Activity-Based Learning (ABL) is an instructional approach that emphasizes active engagement, participation, and hands-on activities as the primary means of learning.</p>	<p>Students will be actively engaged in learning, enhance understanding, improves critical thinking skills. Students will acquire the skills of working in teams.</p>	
5	<p>LIVE NPTEL SESSIONS- offer online courses and certification in various disciplines. NPTEL provides video lectures, course materials, and assignments to learners.</p>	<p>Students will be able to access high-quality content delivered by experts in the field, offering a deeper understanding of academic subjects.</p>	

<p>6</p>	<p>GOOGLE CLASSROOM- Google Classroom is an online platform developed by Google that enables teachers to create, distribute, and manage assignments, as well as facilitate communication and collaboration with students.</p>	<p>Students will be able to track their progress, view their feedback and easily access the study material.</p>	
<p>7</p>	<p>NDL facility available in central library- The National Digital Library is an initiative by the Ministry of Education, Government of India, to provide access to a vast collection of digital educational resources. The NDL aims to facilitate learning by providing high-quality content in various formats, including text, audio, video, and images. It covers a wide range of subjects and is accessible to students, teachers, and learners across</p>	<p>Students will be able to enhance their knowledge by accessing wide range of educational resources, including textbooks, lecture notes, research papers, and multimedia content</p>	

8	<p>HACKATHONS- A hackathon is an event, where individuals or teams come together to collaboratively work on solving problems, developing software, creating innovative projects, or tackling specific challenges.</p>	<p>Students will be able to work in team, within a specific time, focus on project, learn new things</p>	
9	<p>MENTORING- The purpose of mentoring is to facilitate the personal and professional development of the mentee through guidance, advice, and sharing of experiences.</p>	<p>Mentors provide guidance and advice based on their own experiences and expertise. They offer insights into navigating challenges, making decisions, and achieving goals. Mentoring often involves the transfer of knowledge and skills from the mentor to the mentee. This can include industry-specific knowledge, problem-solving approaches, and interpersonal skills.</p>	
10	<p>GROUP BASED ACTIVITIES IN CLASSROOM-Group-based activities in the classroom are instructional strategies that involve students working together in small groups to achieve specific learning objectives. These activities promote collaboration, communication, critical thinking, and problem-solving skills.</p>	<p>Students become active participants in their learning. Students develop skills valued by employers (such as problem-solving, negotiation, conflict resolution, leadership, critical thinking and time management) exposes students to diverse ideas and approaches.</p>	

11

PRODUCT DEVELOPMENT LAB FACILITATING EQUIPMENTS-

The use of product development lab facilitating equipment is crucial in various industries and fields where organizations are engaged in creating and improving products.

Understand modern product development processes. Understand and explain the concept of Industrial design and robust design concepts. Understand the concept of design for manufacture and assembly.
